

## REMARKS

Claims 1 – 15 are pending in this application. Claims 1, 3, and 5 have been amended to more distinctly claim the invention. Support for the amendments can be found in the specification, e.g., stabilizers Nos. 4a and 5 on page 25 of the specification. No new matter has been introduced.

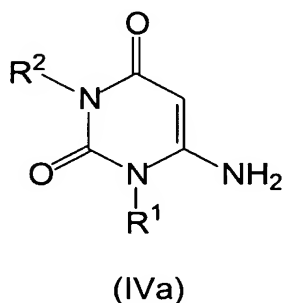

## THE REJECTION

The Examiner has rejected claims 1 – 15 under 35 USC 103(a) as being unpatentable over WO03/004558. This rejection is respectfully traversed.

Applicants' invention, as presently claimed, relates to a stabilizer system for stabilizing halogen-containing polymers against thermal degradation, comprising

(a) at least one perfluoroalkanesulphonate salt and

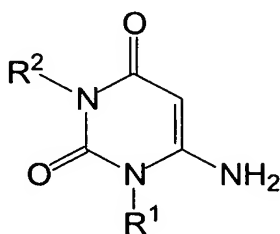

(b) at least one or more indoles and/or ureas and/or alkanolamines and/or aminouracils, wherein the aminouracil can be, inter alia, a compound of the structure

wherein  $R^1$  and  $R^2$ , independently of one another, are H,  $C_1$ - $C_4$  alkoxy- and/or hydroxyl-substituted phenyl, or are phenyl- $C_1$ - $C_4$  alkyl which has  $C_1$ - $C_4$  alkoxy and/or hydroxyl substitution on the phenyl ring,  $C_3$ - $C_6$  alkenyl,  $C_5$ - $C_8$  cycloalkyl, or are  $C_3$ -

C<sub>10</sub> alkyl interrupted by at least one oxygen atom, or are CH<sub>2</sub>-CHOH-R<sub>3</sub>, wherein R<sub>3</sub> is H, C<sub>1</sub>-C<sub>4</sub> alkyl, C<sub>2</sub>-C<sub>4</sub> alkenyl, C<sub>4</sub>-C<sub>8</sub> cycloalkyl, phenyl, C<sub>7</sub>-C<sub>10</sub> alkylphenyl or C<sub>7</sub>-C<sub>10</sub> phenylalkyl, with the proviso that R<sup>1</sup> and R<sup>2</sup> are not both hydrogen. Accordingly, R<sup>1</sup> and R<sup>2</sup> are not alkyl, unsubstituted phenyl, or both hydrogen.

WO03/004558, on the other hand, describes a composition comprising fluoroalkanesulfonic acids and, inter alia, aminouracils of the formula:

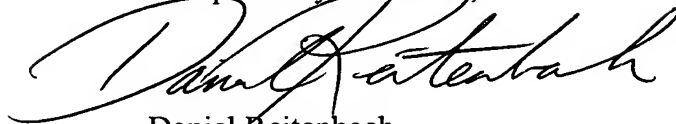

wherein R<sup>1</sup> and R<sup>2</sup>, independently of one another, are H, alkyl, or aryl, unsubstituted or substituted by alkyl groups. WO03/004558 does not teach or suggest any other aminouracils. Accordingly, WO03/004558 does not teach or suggest the aminouracils utilized in Applicants' claimed stabilizer composition.

It is respectfully submitted that the rejection of claims 1 – 15 under 35 USC 103(a) as being unpatentable over WO03/004558, is improper. Reconsideration of this rejection is respectfully requested.

In light of the foregoing, reconsideration and allowance of the present application is respectfully requested.

Respectfully submitted,

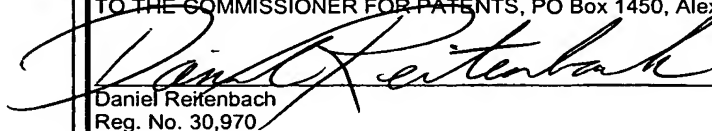

Daniel Reitenbach
